SMB1N-1300D

- Infrared High Power LED
- 1300 nm, 160 mW
- InGaAsP chip, 1000 x 1000 µm
- PA9T SMD package
- Beam Angle: ± 64°

Description

SMB1N-1300D is a surface mount InGaAsP based high power infrared LED, with a typical peak wavelength of 1300 nm and optical output power of 160 mW @ 1 A. It comes in polyamide resin SMD package (PA9T) with silver plated soldering pads (lead free solderable), copper heat sink, and silicone resin molded flat window.

General Notes

Soldering

- Do avoid overheating of the LED
- Do avoid electrostatic discharge (ESD)
- Do avoid mechanical stress, shock, and vibration
- Do only use non-corrosive flux
- Do not apply current to the LED until it has cooled down to room temperature after soldering

Cleaning

- Cleaning with isopropyl alcohol, propanol, or ethyl alcohol is recommended
- DO NOT USE acetone, chloroform, trichloroethylene, or MKS
- DO NOT USE ultrasonic cleaners

Static Electricity

- LEDs are sensitive to electrostatic discharge (ESD).
- Precautions against ESD must be taken when handling or operating these LEDs
- Surge voltage or electrostatic discharge can result in complete failure of the LED.

Radiation

- During operation these LEDs do emit light, which could be hazardous to skin and eyes, and may cause cancer.
- Do avoid exposure to the emitted light. Protective glasses if needed
- It is further advised to attach a warning label on products/systems.

Operation

- Do only operate LEDs with a current source.
- Running these LEDs from a voltage source will result in complete failure of the device.
- Current of a LED is an exponential function of the voltage across it. Usage of current regulated drive circuits is mandatory.

Storage

- The maximum shelf life of LEDs in the originally sealed aluminum bag is 12 months.
- Before opening the aluminum bag, please store it at <30 °C, <60 % RH.
- After opening the aluminum bag, please solder the LEDs within 72 hours (floor life) at 5 – 30 °C, <50 % RH.
- Put any unused, remaining LEDs and silica gel back in the same aluminum bag and then vacuum-seal the bag.
- It is recommended to keep the re-sealed bag in a desiccator at <30%RH.
