TECHNICAL DATA

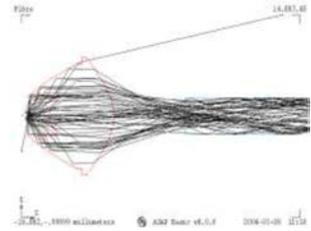

Special Optic for High Power LEDs

Fiber Coupling

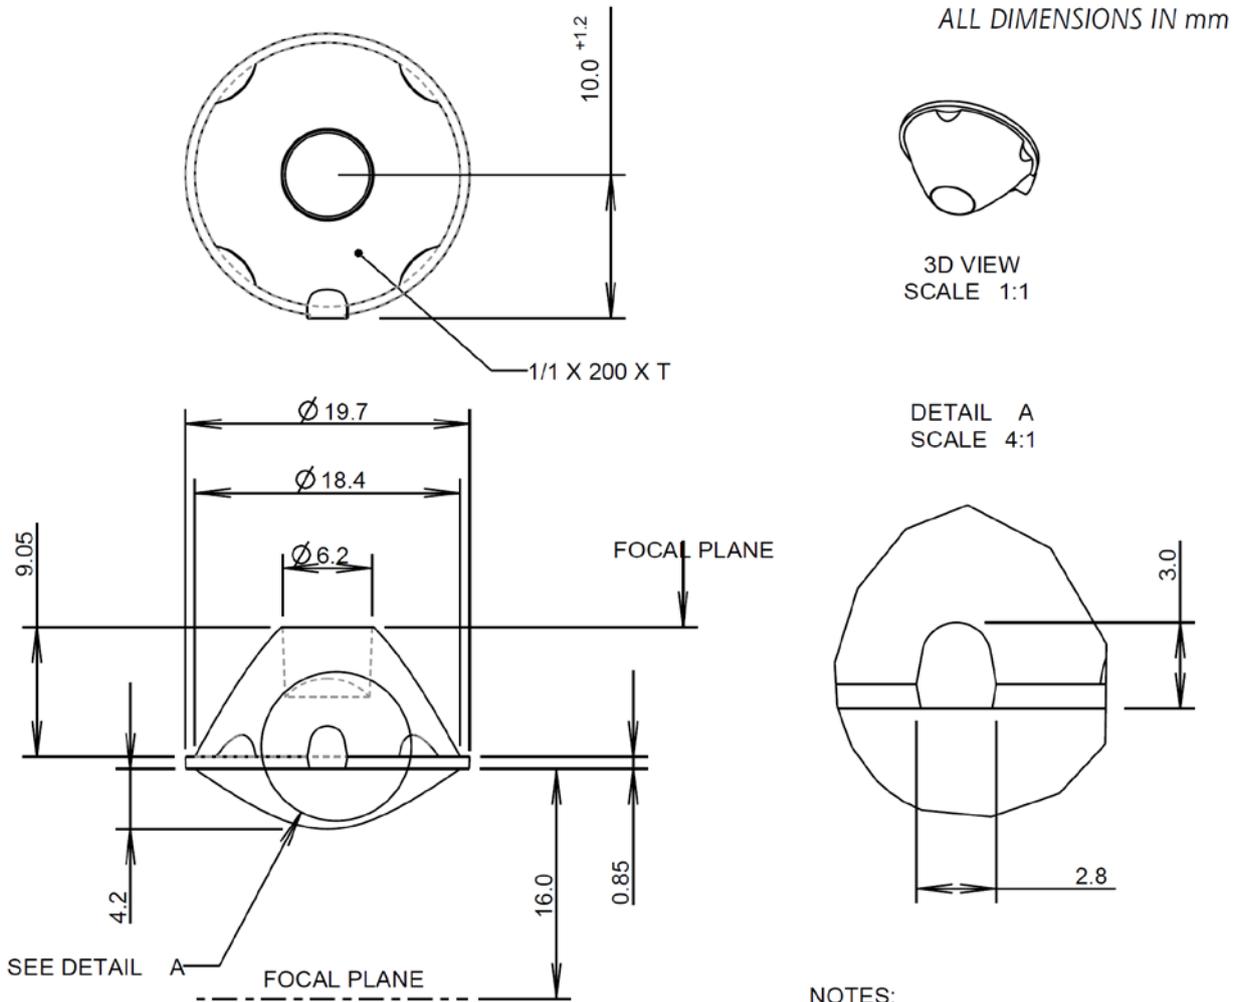

To focus the light from a high power LED to the end of a fiber bundle, we offer a standard 20mm diameter lens with an integrated focusing lens. Optimized for NA 0.5 fiber bundles with diameters between 8 - 12mm, this optic can be used to make compact microscope illumination systems.

Specifications

- Integrated focusing lens
- Ideal for Fiber coupling
- Suitable for: APG2C1 and H2A1 series
- Diameter: Ø20.0 mm, Height: 14.1 mm
- Material: Polycarbonate
